

# MY FAVORITE ODESK CONTRACTORS

I have put together a short list of my favorite oDesk contractors that I have worked with in the past. I know that I wish that someone would have given me a list of stand up contractors before I had to go through and waste money on ones that weren't so great.

## Telemarketing:

### [Rhea Pineda](#)

She is the best! Certainly not your \$2/hr outsourcer, but she was working for me for only 3 hours a day and landing 2 appointments for us a day. They were great appointments to! She helped us put together a script that she was comfortable with AND she has TONS of connections to other telemarketers if you wanted to expand. She is the ONLY telemarketing outsourcer that I would work with, Native English speaking or not.

## Virtual Assistant/Lead Generation:

### [Ana Liza Palad](#)

I used Ana Liza to go through the Yelp and Yellow Pages (and Google places back in the day) to scrape the information so that Rhea could make calls. I also had Ana Liza sending out personalized emails as well as any other tasks I needed done for the day.

She is a HARD worker and I highly recommend her. She also has many connections of people looking for work.

## Wordpress Programming:

### [Stefan C](#)

This guy has helped me out of SOOO many close calls with my Wordpress sites. He is extremely polite and knows a lot about WP. He is my go to guy for stuff like that.
